A 15−Year Network Cartography Centroids
Mean (± SE) within−module degree (z) vs among−module connectivity (c) across 2011...2025
Core species (n = 6)
Peripheral species (n = 39)
Module Hubs
(z ... 1.0, c < 0.5)
Network Hubs
(z ... 1.0, c ... 0.5)
Peripherals
(z < 1.0, c < 0.5)
Connectors
(z < 1.0, c ... 0.5)
Centaurea jacea
Ranunculus acris
Succisa pratensis
Selinum carvifolia
Achillea ptarmica
Pimpinella saxifraga
Sanguisorba officinalis
Polygonum aviculare
Within−module degree (z)
Among−module connectivity (c)
B Interannual Topological Role Transition Dynamics
Annual transition probabilities P(Role$_{t+1}$ | Role$_t$) across 14 consecutive yearly transitions
Core Species (n = 6)
Peripheral Species (n = 39)
Role at year t
Role at year t + 1
